٣٦. Let's paint the house……. . It will be cheaper.

a) myself b) itself c) ourselves d) themselves

C. Reading

The blue whale is the largest living animal to have ever lived on the planet Earth. Blue whales are larger than the largest dinosaurs that ever lived. These mammals rule the oceans at up to ١٠٠ feet (٣٠ meters) and upwards of ٢٠٠ tons. Their tongues alone can weigh as much as an elephant. Fully grown, these great creatures reach a length of over ٣٠ meters and weigh as much as twenty- four large elephants, or more than ١٥٠٠ men. The heart of a blue whale is more than a meter in diameter.

The blue whale is not a fish, even though **it** spends its entire life in the sea. Whales are mammals, just like us. A mother whale gives birth to a live baby whale, not an egg. She feeds not an egg. She feeds her baby with her own milk. While fish are cold- blooded, whales are warm- blooded, and they have lungs and breathe air, like us.

The largest whale ever measured was a female weighing ١٧١،٠٠٠ kgs and measuring over ٩٠ft (٢٧m) long. The longest whale measured was over ١١٠ft (٣٣m). If you laid him out on the ground, he would take up the length of nine family- sized cars.

Even though blue whales are huge, they eat tiny creatures known as krills. Krills are tiny shrimp- like animals. The whale simply opens its mouth, fills it with krill and salt water, and filters the water out of plates in its mouth called baleen. The blue whale may eat over ٨٠٠٠ pounds of krill in a single day!

٣٧. According to the passage, which sentence is **NOT** true?

a) A blue whale is larger than the largest dinosaurs

b) A blue whale can eat over ٨٠٠٠ pounds of krill in a day

c) A mother whale gives birth to a live baby whale, not an egg
d) The blue whale is smaller than some elephants

٣٨. What is the main idea of the paragraph ٢?

a) the way a mother whale feeds her baby
b) some of the differences between blue whales and fish
c) the blue whales spend their whole life in the sea
d) the blue whales breathe like us

٣٩. The word "it" in paragraph ٢ refers to……

a) fish b) blue whale c) mammal d) mother whale

٤٠. What happens to the salt water that the blue whale gulps?

a) It swallows the water b) It turns it to fresh water
c) It measures the water d) It filters the water out
